A fire retardant and IMO certified liquid proof bed protector. The product has been designed for the hotel industry so it is suitable for industrial laundry cycles. The product is manufactured to non-standard sized and shaped beds also.

Fabric

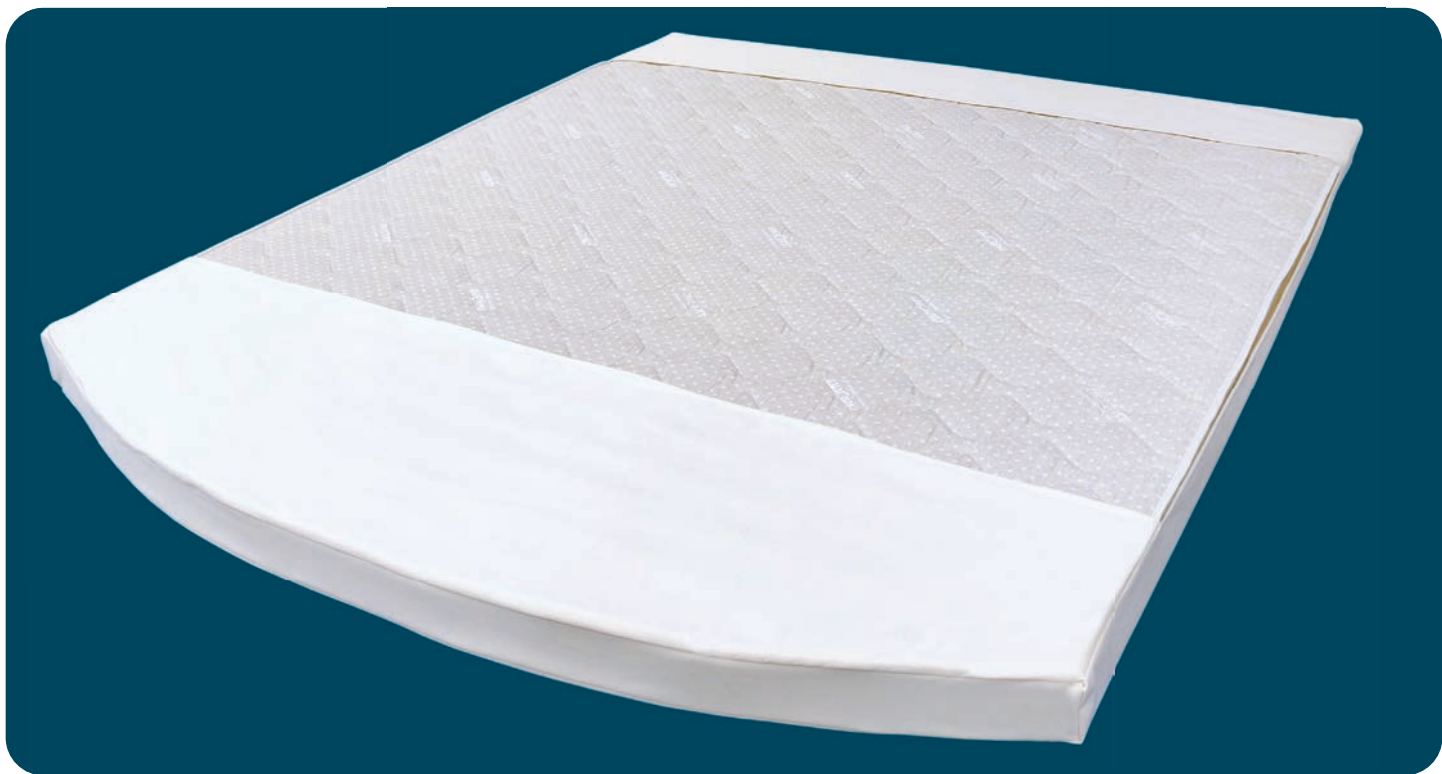

100% polyester, with polyurethane coating. Comfortable, flexible, soft and breathable, fire retardant, liquid proof hygiene fabric Kurt EN1021-2. Fabric's underside is cream in colour, soft top side is off white.

Design

There is a pocket at each end of the mattress protector where the ends of the mattress topper are tucked in. The protectors are manufactured for 5 or 10cm thick mattress toppers as standard, other thicknesses are made on request. This design protects the top and also sides of the mattress topper. The product stays in place extremely well and is unnoticeable to the sleeper. Using a mattress protector you give the mattress topper a longer life and have to wash the mattress topper less frequently. Product is normally manufactured with soft side of the fabric up. On request product can be manufactured with the wipeable side up. Products are colour coded by size unnoticeably in the underside yarn, so that you find the correct size quickly and easily.

Care

Suitable for industrial laundry, washing at 95° C. Tumble drying allowed in low heat.

We manufacture round ended Hulda mattress protectors to customers' bed measurements.

Required measurements:

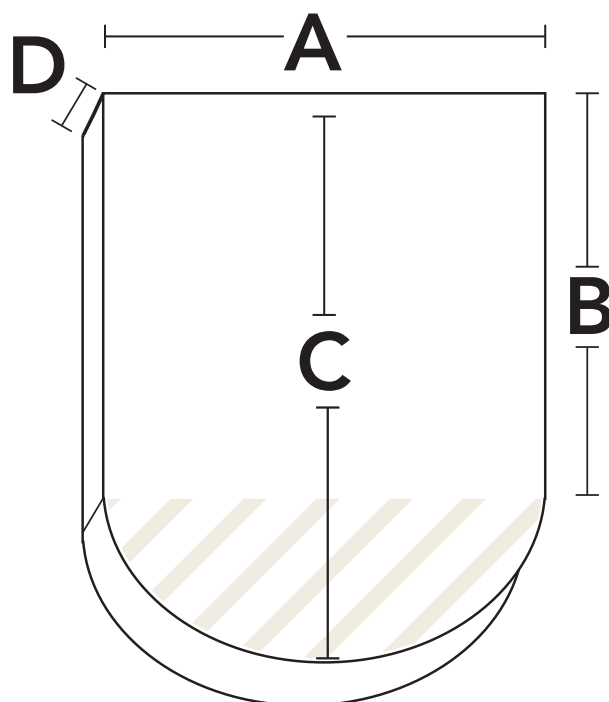

To manufacture this product we require:

- Mattress topper width (**A**)
- Mattress topper length in the side (**B**)
- Mattress topper length in the middle (**C**)
- Mattress topper height (**D**)
- A pattern of the shape of the arch (**lined area**)*

*Pattern can be sent electronically to vormu@vormu.fi or by mail to the below address.

Which parts of the mattress does the protector cover?

Top and all sides.

PUHTAASTI KOTIMAINEN.
